## General Information

### Short summary

A German e-commerce retailer for consumer products is looking for a co-packaging service provider or a contract packaging company to repackage lawn fertiliser into smaller packaging units. Cooperation under an outsourcing agreement is envisaged.

### Full description

The German family business successfully sells various consumer products online. Their product portfolio comprises personalized gifts, jewellery, gardening products, textiles and much more. Their products are sold under their own brands via well-known international online market places and in the company's own online shop. Trade takes place mainly to end customers and, to a small extent, also to business customers.

The German company is looking for a co-packaging service provider or a contract packaging company, which specialises in repackaging products such as lawn fertiliser into smaller units. The German company sources large quantities from lawn fertilizer manufacturers but these are not able to repack them into smaller units.

Therefore, they are looking for a service provider to repackage them into smaller packs. The packaging must be printed in accordance with the German company's specifications.

The quantities and packaging sizes required are as follows:

- 2.5 kg: 400 bags (1 pallet)
- 5.0 kg: 200 bags (1 pallet)
- 10 kg: 1200 bags (12 pallets)
- 20 kg: 288 bags (6 pallets)

The German online retailer is looking for a reliable partner under an outsourcing agreement.

Advantages and innovations

Technical specification or expertise sought

Co-packaging service provider or a contract packaging company able to repackage lawn fertiliser into smaller units. Printing of the new bags according to the company's specifications.
